DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, “low” in “low refractive” renders the claim indefinite. The term “low” is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Other claims are deemed indefinite in view of their dependency upon claim 1.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmid et al (US 5,607,504).¹

Claim 1: Schmid teaches a luster pigment comprising a platelet metal substrate and a coating of low refractive dielectric layer. See col. 1, lines 4-10. Coating A is the low refractive index layer.

Claim 2: The low refractive index ("RI") layer has an RI of 1.8 or lower. See col. 1, lines 3-6.

Claims 3-4: Coating A (low RI layer) has a thickness up to 800 nm or 50-600 nm. See col. 3, lines 45-47.

Claim 5: See col. 3, lines 60-62.

Claim 6: See col. 2, lines 43-46.

Claim 7: See col. 3, lines 32-38.

Claims 8 and 9: col. 1, lines 12-37 and col. 2, lines 15-18. Also col. 7, lines 39-55.

5. Claims 1-3, 5, 6, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 99/35194 ("WO'194").²

Claims 1 and 2: WO'194 teaches a pigment comprising a metal substrate and a coating of dielectric layer. The refractive index of the dielectric layer is 1.6 or lower. See page 5, line 34 to page 6, line 11; and page 6, lines 23-32.

Claim 3: See page 7, lines 14-16.

¹ Provided by Applicant.

Claims 5 and 6: Page 6, lines 12-17 and 23-26.

Claims 8 and 9: See page 6, lines 4-6.
